				Testify Remotely	One (<u>Click</u>	Written Testimony	NC> Please oppose this very problematic bill which includes an ANTI-TRANSPARENCY Clause - blocking the activities of the committee from public oversight - very concerning! The public needs a way to provide oversight! While our state systems appear to be very vulnerable, I don't think is an appropriate way to go about making them more secure. We don't need a "Cybersecurity Advisory Committee" or a "Technology Services Board Security Subcommittee". The money spent on adding new committee staff would be better spent on developing actual security for our computer systems. This falls into the category of making lemonade out of lemons but with no concern for the burden on the taxpayers.
